***Acknowledgement***

Receipt is acknowledged of the Amendment filed June 15, 2005.

***Reasons for Allowance***

Claims 1-6, 8-15, and 17-28 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Herr, taken alone or in combination of other references, does not teach or fairly suggest a current regulator for a superconductivity logic device adapted to be powered by an external power supply comprising, among other things, a biasing resistor coupled to said node and said superconducting logic device (claim 1); a damping impedance coupled between said second node and a superconducting logic device (claim 5); a damping impedance in series with said non hysteretic junction and coupled between said node and said superconducting logic device (claim 13); a damping impedance coupled between node and said superconducting logic device, wherein said damping impedance includes a shunt capacitance (claim 17); and a damping impedance coupled between node and said superconducting logic device, wherein said damping impedance includes a low pass filter (claim 19), as set forth in the claims.

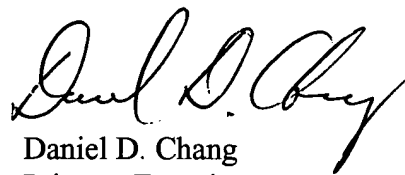

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
